SUBJECT INDEX

ABP (Androgen-binding protein)
  epididymal, the steroid-binding site specificities of, in rat prostate, 487
4-acetoxy-4-androstene-3,17-dione
  regression of hormone-dependent mammary tumors with, in rat, 423
ACTH (adrenocorticotrophin)
  effects of, on steroid secretion of cultured human fetal adrenals, 695
  interaction of, with angiotensin II in control of corticosteroid plasma concentration in man, 235
Actinomycin
  acid ribonuclease activation by, in chick oviduct, 629
Adenocarcinoma
  prostatic, in rat, 13
Adipose tissue
  the interconversion and aromatization of androgens by, in human, 623
Adrenal(s)
  biosynthesis and transformation of 20α,21-dihydroxycholesterol in, in rat, 641
  comparative effects of dexamethasone and phenobarbital on, in rat, 431
  cortex and medulla, response of, to short immobilization stress in unilaterally splanchnicotomized rats, 221
  effects of progesterone, pregnenolene, estriol, ACTH and hCG on steroid secretion in, in human, 695
  pituitary hypothalamus axis, action of anti-glucocorticoids, *in vivo*, 245
  steroid 17α-hydroxylase of, in rat, 397
  steroidogenesis in adult human, 115
Aldosterone
  chromatography of, on Sephadex LH-20 in water, 563
  free, comparison of the urinary excretion of, and its acid-labile conjugate in rats during experimental hyperaldosteronism, 365
  placental transfer of, in the guinea pig, 541
  secretion of, in adult human adrenals, 115
Amniotic fluid
  determination of conjugated steroids in, in human, 499
AMP
  effect of, on synthesis and secretion of testosterone by fetal rat testes, 61
  role of, in molecular control of rabbit follicular testosterone production, 291
Androgen(s)
  binding of, in dog prostate cytosol and in plasma, 449
  binding proteins, in mouse submandibular gland, 129
  concentrations of, in nuclei of seminiferous tubules in developing and mature rats, 195
  endogenous concentrations of, in nuclei of seminiferous tubules of mature rat testes, 633
  interconversion and aromatization of, by human adipose tissue, 623
  metabolism by and binding to mature rabbit epididymal tissue, 87
  receptor, cytoplasmic, characterization in male green frog (*Rana esculenta*), 53
  receptor, evidence for, in castrated ram pituitary cytosol, 677
  receptor, from the R-3327 rat prostatic adenocarcinoma, 13
  serum, temporal changes in, after temporary impairment of Leydig cell function by ethane-1,2-dimethane sulphonate, in rat, 467
Androstenedione
  effects of HCG and PMS on biconversion of, in immature rat testes, 601
Angiotensin II
  interaction of, with ACTH in control of corticosteroid plasma concentration in man, 235
Antiglucocorticoid(s)
  in vivo study of action of, on thymus weight ratio, antibody titre and the adrenal-pituitary-hypothalamus axis, in rats, 245
  study of action of progesterone in rat thymocytes: early *in vitro* effects, 379
Aromatase inhibitors—IV
  Regression of hormone-dependent, mammary tumors in the rat, with 4-acetoxy-4-androstene-3,17-dione, 423

Baboon(s) (*Papio anubis*)
metabolism of pregnenolone and progesterone by testicular microsomes in, 75
testosterone metabolism by placental microsomes in, 241
Binding
of androgens in dog prostate cytosol and in plasma, 449
of androgen proteins in mouse submandibular gland, 129
of androgen to epididymal tissue in mature rabbit, 87
of 5α dihydrotestosterone in the male rat pituitary: evidence for two binding forms, 401
of [^{3}H]-16β-hydroxydehydroepiandrosterone by rat kidney, 285
of [^{3}H] methyltrienolone to both progestin and androgen binding components in human benign prostatic hypertrophy, 483
of progesterone protein from streptomyces hydrogenans, 277
of progesterone receptor in uterus of guinea pig, 43
of steroids by a partially purified periplasmic protein from *Pseudomonas testosteroni*, 207
site of cytochrome P-450, analysis of, 393
sites of testosterone-progesterone, in human, 371
steroid differences of site specificities of rat prostate androgen receptor and ABP, 487
BPH (human benign prostatic hypertrophy)
specific binding of [^{3}H]-methyltrienolone to both progestin and androgen binding components in, 483
Bovine
liver, metabolites of estradiol-17β in, 179
serum albumin, procedures for attaching steroidal glucosiduronic acids to, 166
serum, glucuronidation of 3α hydroxysteroids *in vitro*, in, 161
testosterone-4-serum albumin conjugates, preparation of antigenic properties of, 513
Cancer
breast, effect of estrone on cell proliferation, on long-term tissue culture, in human, 341
Carcinoma
estrogen production by and established cell line from pulmonary small cell, in human, 339
Castration
effects of, in rabbit, 87
influence of, on androgen receptors in pituitary cytosol of ram, 677
Chenodeoxycholic acid
degradation of, by *Pseudomonas* spp. NCIB 10590, 311
Chick
embryo, origin of transcortin in, 553
oviduct, acid ribonuclease activation in, by tissue damage, actinomycin D and progesterone, 629
oviduct, progesterone receptor A subunit, purification and characterization, 1
steroid receptor binding to nuclei, effect of assay conditions on the integrity of chromatin, in oviduct, 343
two estrogen receptors in reproductive tissue, 31
Chromatin
integrity of, effect of assay conditions in chick oviduct, 343
Chromatography
an automated multicolumn system for, of aldosterone on Sephadex LH-20 in water, 563
Circadian rhythm
of cholesterol-7α-hydroxylase activity, in mouse and rat, 647
of plasma testosterone, suppression of, in normal adult males, 81
Concanavalin A
stimulation, in isolated rat thymocytes, 581
Corticosteroid
plasma concentrations, control of, in man, 235
Corticosterone
secretion of, in adult human adrenals, 115
Cortisol
metabolism, influence of serum proteins on, by the human placenta, 387
secretion of, in adult human adrenals, 115
Cycloheximide
effect of, on 20α-dihydro-progesterone synthesis in pseudo-pregnant rat ovaries, 689
Cytochrome
analysis of binding site of, using multiple inhibitors, in rat testis, 393
liver, effects of dexamethasone and phenobarbital on contents of, 431

Deciduoma
estrogen and progestin receptors in, in rat, 139
Dexamethasone
characteristics of, binding to hippocampal cytosol receptors in pigs, 147
effects of, on adrenal cortex, liver cytochrome P-450 contents and serum thyroid hormones in rat, 431
effect of, on the circadian rhythm of plasma testosterone in humans, 81
Dibutyryl cyclic AMP
effect of, on synthesis and secretion of testosterone in fetal rat testes, 61
Dihydroprogesterone
antagonist action of, on the formation of the specific dihydrotestosterone-cytoplasmic receptor complex in rat ventral prostate, 419
20α,21-dihydroxycholesterol
biosynthesis and transformation of, by rat adrenal preparations, 641
20α-dihydroprogesterone
synthesis, effect of prolactin, prostaglandin F2a and cycloheximide on, in pseudo-pregnant rat ovaries, 689
5α-dihydrotestosterone
receptor, of uterine myometrium and myoma, in human, 615
nuclear binding of, in male rat pituitary, 401
Dog
binding of androgens in prostate cytosol and in plasma of, 449
estradiol and progesterone receptors in prostate cytosol of, 459
lack of metabolism of, progesterone to 5α products in, 173
Endometrium
human high affinity binding of estradiol, 17β in nuclei of, 529
specificity of medroxyprogesterone acetate binding in, in human, 371
Epididymus
androgen metabolism in, in rabbit, 87
Estradiol
dissociated effects of, on uterus and liver functions in rat, 105
high affinity binding of, in nuclei of human endometrial cells, 529
metabolites of, in bovine liver, 179
nuclear uptake of, in human mammary tissue, 595
receptor assay, factors influencing, in human, 95
receptor, in dog prostate cytosol, 459
receptor, nuclear, occupied and unoccupied, in human breast tumors: relation to estradiol and progesterone cytosol receptors, 661
receptor of uterine myometrium and myoma, in human, 615
Estradiol 2-hydroxylase
properties of, in rat liver, 227
Estriol
effects of, on steroid secretion of cultured human fetal adrenals, 695
Estriol-16-glucuronide
radioimmunoassay of, using tritiated and radioiodinated radioligands in human, 443
Estrogen
kinetics of hepatocellular transport and metabolism of, in rat, 37
ontogeny of, inducibility of uterine peroxidase in female rat, 359
production by and established cell line from human pulmonary small cell anaplastic carcinoma, 339
receptor, evidence for, in castrated ram pituitary cytosol; influence of time of castration, 677
receptor forms in human myometrial cytosol, 155
receptor from the R-3327 rat prostatic adenocarcinoma, 13
receptor in deciduma of the rat, 139
receptor, in hamster kidney during estrogen-induced renal tumorigenesis, 123
receptor, in reproductive tissue in chick and human, 31
receptors, the hydroxylapatite-column assay of, 267
Estrone
effects of, on cell proliferation of a human breast cancer (MCF-7) in long-term tissue culture, 341
Estrone sulfate
comparison with estrone-ethinylestradiol, in rat, 37
Ethane,-1,2-dimethane sulphonate
use of, to impair Leydig cell function, in adult rat, 467

17α-ethynylsteroids
in vitro metabolism of, in rabbits, 437
Fetus
steroidogenesis in tissue culture of human adrenals, 115
stimulation of steroidogenesis in human testes by the placenta during perifusion, 109
synthesis and secretion of testosterone by rat testes, 61
Fibroblasts
glucocorticoid receptor in, in human, 587
Gas chromatography
plasma levels of norethisterone measured by, in human, 121
Gland
submandibular, androgen binding proteins in, in mouse, 129
Glucocorticoid
binding fractions, separation of, from cytosol of rat heart, 215
budesonide, pharmacokinetic studies of, in dogs by high-performance liquid chromatography, 317
differential sensitivity to, of isolated rat thymocytes following concanavalin A stimulation, 581
effects of, *in vitro*, on human lymphocyte subpopulations, 609
inhibition of, of hexose transport, kinetic studies on the mechanism of, in rat thymocytes, 573
receptor, alterations in specificity of, with temperature in rat, 21
receptor, in cultured human fibroblasts, 587
receptor, in polymorphonuclear leukocytes, in human, 475
17β-D-glucopyranosicle
of estradiol-14α, identification of, in bovine liver, 179
Glucosiduronic acids
steroidal, procedures for attachment of, to bovine serum albumin, 1966
Glucuronidation
of 3α-hydroxysteroids, in vitro, of rabbit liver and bovine serum, 161
GMP
role of, in molecular control of rabbit follicular testosterone production, 291
Gonadotropin
increased levels of, in newborn premature females treated by phototherapy, 335
Guinea pig
female, induction, purification and characterization of 17β-hydroxy-G_9 steroid dehydrogenase, of kidney, 187
nuclear binding of uterine progesterone receptor, 43
placental transfer of aldosterone in, during late pregnancy, 541
Hamster
estrogen receptor in, during estrogen-induced renal tumorigenesis, 123
HCG
effects of, on bioconversion of progesterone, androstenedione and testosterone in immature rate testes, 601
effects of, on steroid secretion of cultured human fetal adrenals, 695
responsive Leydig cell tumor variants, steroidogenesis in, in mouse testis, 669
Heart
separation of three glucocorticoid-binding fractions from cytosol of rat, 215
Hexose transport
kinetic studies on the mechanism of glucocorticoid inhibition of, in rat thymocytes, 573
Horse
in vivo biosynthesis of steroids from tyrosine, 701
Human
cultured fetal adrenals, effects of progesterone, pregnenolone, estriol, ACTH and HCG on steroid secretion of, 695
determination of conjugated steroids in amniotic fluid, 499
dexamethasone-induced suppression of circadian rhythm of plasma testosterone, in adult males, 81
effects of estrone on cell proliferation of a breast cancer (MCF-7) in long-term tissue culture, 341
endometrial cells, high affinity binding of estradiol 17β in nuclei of, 529
endometrium, specificity of medroxyprogesterone acetate binding in, 371
estradiol-17β, progesterone and 5α-dihydrotestosterone receptors of uterine myometrium and myoma, 615
estrogen production by an established cell line from pulmonary small cell anaplastic carcinoma, 339
factors that may influence the estradiol receptor assay in, 95

glucocorticoid receptor in cultured fibroblasts, 587
glucocorticoid receptor in polymorphonuclear leukocytes: a simple method for leukocyte glucocorticoid receptor characterization, 475
increased gonadotropin levels in newborn premature females treated by phototherapy, 335
interaction of ACTH and angiotensin II in the control of corticosteroid plasma concentration, 235
interconversion and aromatization of androgens by adipose tissue, 623
isotope effects in the metabolism of labelled steroids, 99
lymphocyte subpopulations: effects of glucocorticoids *in vitro*, 609
nuclear uptake of estradiol-17β in mammary tumor tissue, 595
metabolism of a new synthetic progestagen, Org 2969 by liver, *in vitro*, 353
myometrial cytosol, estrogen receptor forms in, 155
occupied and unoccupied nuclear estradiol receptor in breast tumors, 661
placenta, influence of serum proteins on the metabolism of cortisol by, 387
plasma levels of norethisterone measured by radioimmunoassay and gas chromatography–mass fragmentography, 121
purification and characterization of sex hormone binding globulin, 535
radioimmunoassay of 17-hydroxyprogesterone: physiological variations and pathological values, 569
specific binding of [^{3}H]-methyltrienolene to both progestin and androgen binding component in benign prostatic hypertrophy, 483
steroidogenesis in tissue culture of fetal and adult adrenals, 115
stimulation of steroidogenesis in fetal testes by the placenta during perifusion, 109
two estrogen receptors in reproductive tissue, 31

(24S) and (24R)-1-α-hydroxy-[24-^{3}H]-cholecalciferol
synthesis of, 411

18-hydroxy-11-deoxycorticosterone
arterial levels and mineralocorticoid activity of, in rat, 67

18 hydroxy-11-deocycorticosterone and 18-hydroxycorticosterone
M and L forms of, factors influencing conversion stability and immunological properties, 557

2 hydroxy-3-deoxyestradiol-3-hydroxylase
properties of, in rat liver, 227

17-hydroxyprogesterone
radioimmunoassay of, physiological variations and pathological values in man, 569

17β-hydroxy-G_9 steroid dehydrogenase
induction, purification and characterization of, in female guinea pig kidney, 187

[^{3}H]-16β-hydroxyde hydroepiandrosterone
specific binding of, by rat kidney, 285

Hydroxylapatile
column assay of estrogen receptors; the routine analysis of many samples and the calculation of the equilibrium association constant, 267

17α-hydroxylase
steroid, of the rat adrenal, 397

3α-hydroxysteroids
glucuronidation of, in rabbit liver and bovine serum, 161

17β-hydroxysteroid dehydrogenase
antiserum of, effects of, on steroid uptake in *Pseudomonas testosteroni*, 519
localization of, in *Pseudomonas testosteroni*, 523
subcellular distribution and properties of, in pregnant rabbit uterus, 653

Hyperaldosteronism
experimental, comparison of the urinary excretion of free aldosterone and its acid-labile conjugate during, in rat, 365

Inhibitor(s)
specific, effects of, on steroid uptake in *Pseudomonas testosteroni*, 519

Interstitial tissue
[4-^{14}C]-testosterone metabolism and steroid production by, in rat, 505

19-iodo-5-androstene-3β,17β-diol-17β-yl-acetate
synthesis of, 571

Kidney
estrogen receptor in, in hamster, 123
induction, purification and characterization of 17β-hydroxy-C_{19} steroid dehydrogenase of female guinea pig, 187

rat, specific binding of [^{3}H]-16β-hydroxydehydroepiandrosterone in, 285
Kinetics
of hepatocellular transport of, estrogens in rat, 37
of mechanism of glucocorticoid inhibition of hexose transport in rat thymocytes, 573
of metabolism of estrogens, in rat, 37
Leukocytes
polymorphonuclear, glucocorticoid receptor in, a simple method for leukocyte glucocorticoid receptor characterization, in human, 475
Leydig cell
impairment of function of, by ethane-1,2-dimethane sulphonate in adult rat, 467
tumor variants, HCG responsive, steroidogenesis in mouse testis, 669
L.H.
effect of, comparison with dibutyryl cyclic AMP, in rat, 61
Liver
bovine, metabolites of estradiol-17β in, 179
functions, dissociated effects of tamoxifen and estradiol on, in rat, 105
glucuronidation of 3α-hydroxysteroids *in vitro*, in rabbit, 161
metabolism of a new synthetic progestagen, Org 2969, in, in human, 353
microsomes, isolation of a NAD 3β(a)-hydroxy-5β-androstane dehydrogenase, from rat, 201
properties of estradiol 2-hydroxylase and 2-hydroxy-3-deoxyestradiol-3-hydroxylase in rat, 227
17,20-Lyase
analysis of the cytochrome P.450 binding site using multiple inhibitors, in rat testis, 393
Lymphocyte
human subpopulations; effects of glucocorticoids *in vitro*, 609
splenic, alterations of specificity of the glucocorticoid receptor with temperature, in rat, 21
Mammary tumors
hormone dependent, regression of, with 4-acetoxy-4-androstene-3,17-dione, in rat, 423
nuclear uptake of estradiol-17β, in human, 595
Marmoset (*Saguinus oedipus*)
metabolism of pregnenolone and progesterone by testicular microsomes in, 75
Mass fragmentography
plasma levels of norethisterone measured by, in humans, 121
Medroxyprogesterone acetate
specificity of binding in human endometrium, 371
[^{3}H]-methyltrienolone
specific binding of, to both progestin and androgen binding components in human benign prostatic hypertrophy (BPH), 483
Mineralocorticoid
activity of, 18-hydroxyl-11 deoxycorticosterone, in rat, 67
Monkey
ovaries, metabolism of progesterone to 5α steroids in, comparison with mouse and rat, 549
Mouse
circadian rhythm of cholesterol-7α-hydroxylase activity, 647
ovaries, metabolism of progesterone to 5α steroids in comparison with monkey and rat, 549
steroidogenesis in HCG-responsive Leydig cell tumor variants, in testes, 669
submandibular gland, androgen binding proteins in, 129
Myoma
estradiol-17β, progesterone and 5α dihydrotestosterone receptor of, in human, 615
Myometrium
uterine, estradiol-17β, progesterone and 5α dihydrotestosterone receptors of, in human, 615
NAD: 3β(α)-hydroxy-5β-androstane dehydrogenase
isolation of, from rat liver microsomes, 201
NADPH: 4-ene-3-ketosteroid, 5α-oxidoreductase
biochemical characterization of, in rat ovarian suspension cultures, 325
19-nor-4-androstenedione
identification of, in baboons, 241
19-nortestosterone
identification of, in baboons, 241
Ovary
biochemical characterization of the NADPH: 4-ene-3-ketosteroid, 5α oxidoreductase, in rat, 325

monkey, mouse and rat, a comparison of metabolism of progesterone to 5α steroids in, 549
pseudo-pregnant, *in vitro* effect of prolactin prostaglandin, F2α and cycloheximide on 20α-dehydroprogesterone synthesis, in rat, 689
Oviduct
acid ribonuclease activation in, by tissue damage, actinomycin D and progesterone, in chick, 629
purification and characterization of progesterone receptor of subunit A, chick, 1
steroid receptor binding to nuclei in, in chick, 343
Pharmacokinetics
studies of a potent glucocorticoid (budesonide) in dogs, by high performance liquid chromatography, 317
Pigs
characteristics of dexamethasone binding to hippocampal cytosol receptors, 147
Pituitary
cytosol, evidence for androgen and estrogen receptors in, in castrated ram, 677
nuclear binding of 5α-dehydrostestosterone of, in male rat, 401
Placenta
stimulation of steroidogenesis by, in human fetal testes during perifusion, 109
transfer of, of aldosterone in the guinea pig during late pregnancy, 541
Pregnenolone
effects of, on steroid secretion of cultured human fetal adrenals, 695
metabolism of, by testicular microsomes of baboon and marmoset, 75
Progestagen
Org 2969, metabolism of, by human liver *in vitro*, 353
Progesterone
acid ribonuclease activation by, in chick oviduct, 629
antiglucocorticoid action of, in rat thymocytes, 379
binding protein from *Streptomyces hydrogenans*, 277
binding site of, interaction with testosterone, in human, 371
cytosol receptor, relation to occupied and unoccupied nuclear estradiol receptor, in human breast tumor, 661
effects of HCG and PMS on bioconversion of, in immature rat testes, 601
effects of, on steroid secretion of cultured human fetal adrenals, 695
lack of metabolism of, to 5α products in dog and guinea pig testes compared with immature rat testes, 173
metabolism of, by testicular microsomes of baboon and marmoset, 75
metabolism of, to 5α steroids, a comparison in monkey, mouse and rat ovaries, 549
receptor A subunit, purification and characterization of, in chick oviduct, 1
receptors of, in dog prostate cytosol, 459
receptor of, nuclear binding of, in cell-free preparations in guinea pig uterus, 43
receptor, of uterine myometrium and myoma, in human, 615
Progestin
receptors, in deciduoma of rat, 139
specific binding of [^{3}H]-methyltrienolone to, in human, 483
Prolactin
in vitro effect of, on 20α-dihydro-progesterone synthesis in pseudo-pregnant rat ovaries, 689
Prostaglandin, $F_2\alpha$
in vitro effect of, on 20α-dihydroprogesterone synthesis in pseudo-pregnant rat ovaries, 689
Prostate
androgen receptor, steroid-binding site specificities of, in rat, 487
binding of androgens in, in dog, 449
nuclei, testosterone-activated RNA synthesis in, in rat, 299
R-3327 adenocarcinoma, characterization and comparison of estrogen and androgen receptors, in rat, 13
ventral, antagonist action of dihydroprogesterone on the formation of the specific dihydrotestosterone—cytoplasmic receptor complex in, in rat, 419
Pseudomonas testosteroni
binding of steroids by a partially purified periplasmic protein from, 267
degradation of chenodeoxycholic acid by, 311
effects of specific inhibitors and an antiserum of 3β and 17β-hydroxysteroid dehydrogenase on steroid uptake in, 519
localization of 3β and 17β-hydroxy-steroid dehydrogenase in, 523
Radioimmunoassay
measurement of plasma levels of norethisterone by, in human, 121
of estriol-16-glucuronide using tritiated and radioiodinated radioligands, in human, 443

of 17-hydroxy-progesterone: physiological variations and pathological values, in man, 569
of urinary estriol-16-glucuronide during the menstrual cycle, 443
Rabbit
epididymal tissue, androgen metabolism by and binding to, 87
in vitro metabolism of 17α ethynylsteroids, 437
liver, glucuronidation of 3α-hydroxysteroids in, 161
molecular control of follicular testosterone production in, 291
subcellular distribution of properties of 17β-hydroxysteroid dehydrogenase in pregnant uterus, 653
Ram
castrated, evidence for androgen and estrogen receptors in pituitary cytosol, 677
Rat
adrenal of, steroid 17α hydroxylase in, 397
arterial levels and mineralocorticoid activity of 18-hydroxy-11-deoxy-corticosterone, 67
biosynthesis and transformation of 20α,21-dihydroxycholesterol by adrenal preparations, 641
circadian rhythm of cholesterol-7α-hydroxylase activity, 647
comparative effects of dexamethasone and phenobarbital on adrenal cortex, liver cytochrome P450 contents and serum thyroid hormones in, 431
comparison of the urinary excretion of free aldosterone and its acid-labile conjugate, during experimental hyperaldosteronism, 365
differences in the steroid-binding site specificities of prostate androgen receptor and epididymal androgen-binding protein (ABP), 487
differential sensitivity of isolated thymocytes to glucocorticoids following concanavalin A stimulation, 581
effects of HCG and PMS on bioconversion of progesterone, androstenedione and testosterone in immature testes, 601
endogenous androgen concentrations in nuclei isolated from semniferous tubules of mature testes, 633
fetal, synthesis and secretion of testosterone by, in testes, 61
heart, separation of three glucocorticoid-binding fractions from cytosol of, 215
kidney, specific binding of [^{3}H]-16β-hydroxydehydroepiandrosterone in, 285
kinetics of hepatocellular transport and metabolism of estrogens in, 37
kinetic studies on the mechanism of glucocorticoid inhibition of hexose transport in thymocytes, 573
immature testes, lack of metabolism of progesterone to 5α products in, 173
in vitro effect of prolactin, prostaglandin $F_2\alpha$ and cycloheximide on 20α-dihydroprogesterone synthesis in pseudo-pregnant ovaries, 689
in vivo study of the action of anti-glucocorticoids on thymus weight ratio, antibody titre and the adrenal pituitary-hypothalamus axis, 245
liver microsomes, isolation of a NAD: 5β(α)-hydroxy-5β-androstane dehydrogenase in, 201
liver, properties of estradiol-2-hydroxylase and 2-hydroxy-3-deoxy-estradiol-3-hydroxylase, 227
mature, concentrations of androgens in nuclei of seminiferous tubules in, 195
ontogeny of the estrogen inducibility to, of uterine peroxidase in, 359
ovarian suspension cultures—biochemical characterization of the NADPH-4-ene-3-ketosteroid 5α oxidoreductase, 325
ovaries, metabolism of progesterone to 5α steroids in, comparison with monkey and mouse, 549
pituitary of, nuclear binding of 5α on hydrotestosterone in, 401
R-3327 prostatic adenocarcinoma, characterization and comparison of the estrogen and androgen receptors from, 13
serum testosterone concentrations, 71
splenic lymphocytes, alteration in specificity of the glucocorticoid receptor, 21
synthesis and biological activity of 25,26,27-trisnor-vitamin D_3 24-oic acid and its 1α-hydroxyl analog, 261
testis of, 17,20-lyase, analysis of the cytochrome P.450 binding site using multiple inhibitors, 393
testosterone-activated RNA synthesis in isolated prostate nuclei, 299
[4-^{14}C]-testosterone metabolism and steroid production by incubated whole testes, seminiferous tubules and interstitial tissue from, 505
thymocytes of, studies of the antiglucocorticoid action of progesterone in, 379
unilatellary splanchnicotomized, response of adrenal cortex and medulla to short immobilization stress, 221
Receptor(s)
dihydrotestosterone–cytoplasmic complex, formation of, in rat ventral prostate, 419
5α dihydrotestosterone, of uterine myometrium and myoma, in human, 615
glucocorticoid, alterations in specificity of, in rat splenic lymphocytes, 21
glucocorticoid, in cultured human fibroblasts, 587
glucocorticoid, in polymorphonuclear leukocytes, in human, 475

of androgen, characterization of, in male secondary sexual character of green frog, 53
of androgen, evidence for, in castrated ram pituitary cytosol, 677
of estradiol, factors that may influence the assay of, in human, 95
of estradiol and progesterone, in dog prostate cytosol, 459
of estradiol 17β, of uterine myometrium and myoma in human, 615
of estrogen, evidence for, in castrated ram pituitary cytosol, 677
of estrogen, forms in human myometrial cytosol, 155
of estrogen, hydroxylapatite-column assay of, 267
of estrogen, in hamster kidney during estrogen-induced renal tumorigenesis, 123
of estrogen and progestin in deciduoma of rat, 139
of hippocampal cytosol, characteristics of dexamethasone binding to, in pigs, 147
of progesterone, of uterine myometrium and myoma in human, 615
of progesterone, nuclear binding of, in guinea pig uterus, 43
steroid, binding to nuclei in chick, 343
two estrogen, in reproductive tissue in chick and human, 31
RNA
testosterone activated synthesis of, in isolated prostate nuclei, in rat, 299
Seminiferous tubules
concentrations of androgens in nuclei of, in rat, 195
nuclei, endogenous androgen concentration in, in mature rat testes, 633
[4-^{14}C]-testosterone metabolism and steroid production by, in rats, 505
Sephadex LH-20
an automated multicolumn system for chromatography of aldosterone on, 563
Sex hormone
binding globulin and endogenous steroids in human, 95
binding globulin, purification and characterization of, in human, 535
Steroid
binding of, by a partially purified periplasmic protein from *Pseudomonas testosteroni*, 207
binding site specificities of androgen receptor of rate prostate and epididymal androgen-binding protein (ABP), 487
conjugated, determination of, in amniotic fluid in human, 499
endogenous, in human, 95
hormones, uptake of, by nuclei in various phases of the cell mitotic cycle, in mouse and rat, 305
in vivo biosynthesis of, from tyrosine, in horse, 701
labelled, isotope effects in the metabolism of, in human, 99
production, by incubated whole testes, seminiferous tubules and interstitial tissue from rats, 505
receptor binding to nuclei, effect of assay conditions on the integrity of chromatin, in chick oviduct, 343
secretion, effects of progesterone, pregnenolone, estriol, ACTH and HCG on, in cultured human fetal adrenals, 695
uptake, effects of specific inhibitors and an antiserum of 3β and 17β hydroxysteroid dehydrogenase, in *Pseudomonas testosteroni*, 519
labelled, isotope effects in the metabolism of, in human, 99
5α steroids
metabolism of progesterone to, in monkey, mouse and rat ovaries, 549
Steroid 17α hydroxylase
of rat adrenal, 397
Streptomyces hydrogenans
progesterone-binding protein from, 277
Steroidogenesis
in HCG-responsive Leydig cell tumour variants, in mouse, 669
in tissue culture of fetal and adult human adrenals, 115
stimulation of, in human fetal testes, 109
Submandibular gland
androgen binding proteins in, in mouse, 129
Tamoxifen
dissociated effects of, on uterus and liver functions in rat, 105
Testis
fetal, stimulation of steroidogenesis in human, 109
fetal, synthesis and secretion of testosterone by, in rat, 61

immature, effects of HCG and PMS on bioconversion of progesterone, androstenedione and testosterone, in rat, 601
mature, endogenous androgen concentrations in nuclei isolated from seminiferous tubules of, in rat, 633
of rat, 17,20-Lyase of the cytochrome P.450 binding site using multiple inhibitors, 393
rat, immature, lack of metabolism of progesterone to 5α products in, 173
[4-^{14}C]-testosterone metabolism and steroid production by, in rats, 505
Testosterone
binding site of, interaction with that of progesterone, in human, 371
-4-bovine serum albumin conjugates, preparation of antigenic properties of, 513
effects of HCG and PMS on bioconversion of, in immature rat testes, 601
metabolism of, by placental microsomes from baboons, 241
metabolism of, by incubated whole testes, seminiferous tubules and interstitial tissue from rats, 505
plasma, dexamethasone-induced suppression of circadian rhythm of, in normal adult males, 81
serum, concentrations in pregnant rat, 71
synthesis and secretion of, by fetal rat testes, 61
Thymocytes
differential sensitivity of, to glucocorticoids following concanavalin A stimulation in rat, 581
kinetic studies on the mechanism of glucocorticoid inhibition of hexose transport in, in rat, 573
of rat, studies of antiglucocorticoid action of progesterone, 379
Tiaprofenic acid
interference of, in Zimmerman reaction in human, 471
Transcortin
origin of, in chick embryo, 553
25,26,27-trisnor-vitamin D_3 24-oic acid
synthesis and biological activity of, in rat, 261
Tumorigenesis
renal, estrogen receptor in hamster kidney during, 123
Tyrosine
in vivo biosynthesis of steroids from, in horse 701
Uterine peroxidase
ontogeny of the estrogen inducibility of, in rat, 359
Uterus
dissociated effects of tamoxifen and estradiol-17β on, in rat, 105
myometrium of, estradiol 17β progesterone and 5α dihydrotestosterone receptors of, in human, 615
subcellular distribution and properties of 17β hydroxysteroid dehydrogenase in pregnant rabbit, 653
Zimmerman reaction
interference of tiaprofenic acid in, 471
